William of Malmesbury

William of Malmesbury (c. 1095 – c. 1143) was an English historian and biographer, regarded as one of the foremost historians of 12th-century England. He is best known for his historical works, which include the *Gesta Regum Anglorum* (Deeds of the Kings of Britain) and the *Deeds of the Bishops*. His historical writings were highly influential in medieval England, and he is considered one of the most talented historians of the 12th century.

His historical works are characterized by their meticulous attention to detail, extensive use of primary sources, and his critical approach to the sources he used. William of Malmesbury's historical works are not without their problems, however. He was known for his credulity and for his willingness to accept hearsay and rumor as reliable evidence. This often led to his historical narrative being criticized for its lack of critical judgment and its reliance on unreliable sources.

In his *Chronicle of the Kings of England*, William of Malmesbury provides a detailed account of the history of England from the earliest period to the reign of King Stephen. The *Chronicle* is considered one of the most important sources for the history of England in the 12th century, and it remains an important source for historians studying medieval England.

In *The Life of Saint Wulstan*, William of Malmesbury provides a detailed account of the life of the 11th-century bishop of Worcester. The *Life* is one of the most important sources for the study of 12th-century monastic life in England.

William of Malmesbury's contributions to medieval English history continue to be studied and debated by scholars today. His works are considered essential reading for anyone interested in the history of medieval England.
William of Malmesbury and King Arthur

May 24th, 2020 - William of Malmesbury's paragraph in his History of the Kings of England as quoted above in translation by naming Arthur as giving Ambrosius aid and by making clear that he was the main warrior leader of the Britons' victory on the Badonic Hill yet without claiming that he was the general in charge of the battle is as good a reconciliation as there could be between Gildas and William of Malmesbury's encyclopedia.
